SKILLS

LANGUAGES

Java C# JavaScript

SQL

AUTOMATION & TESTING

Playwright Selenium

SpecFlow UFT BDD

MochaJS API Testing

JMeter Blazemeter

TOOLS & PLATFORMS

Jenkins TeamCity Git

Jira Postman Swagger

AWS Bitbucket

METHODOLOGIES

Agile Scrum

EDUCATION

B.Sc. in Computer Technology
KG College of Arts & Science
(Bharathiar University)
2013 – 2016 | CGPA: 8.2

CERTIFICATIONS

- ▶ AWS Certified Cloud Practitioner
- ▶ AWS Certified Developer - Associate

JANAKI NANDHINI

SOFTWARE TEST ENGINEER & AUTOMATION SPECIALIST

PROFESSIONAL SUMMARY

Strategic Quality Engineering Professional with over 9 years of experience specializing in the design and implementation of automated testing solutions. Proven track record in architecting scalable frameworks across .NET (C#), Java, and JavaScript ecosystems. Expert in driving CI/CD integration, mentoring cross-functional teams, and optimizing the Software Development Lifecycle (SDLC) to ensure high-quality software delivery in complex enterprise environments.

PROFESSIONAL EXPERIENCE

Software Test Engineer Jul 2022 – Present

Commonwealth Bank of Australia · Bangalore, Karnataka

- **Strategic Leadership:** Spearheaded the transition to Playwright, reducing execution time by 40% and enhancing cross-browser testing reliability.
- **Framework Architecture:** Designed and maintained a robust BDD automation framework using SpecFlow (.NET/C#), facilitating seamless collaboration between technical and non-technical stakeholders.
- **Quality Governance:** Led end-to-end functional testing for mission-critical banking applications, ensuring 100% compliance with stringent financial security standards.

Automation QA Engineer Nov 2020 – Jul 2022

GlobalSignIn Pte Limited · Singapore (Remote)

- **Infrastructure Optimization:** Established a comprehensive CI/CD pipeline using Jenkins, enabling automated regression suites to trigger on every pull request, reducing manual overhead by 60%.
- **Scalable Automation:** Developed a modular Selenium-JavaScript framework utilizing the Page Object Model (POM) to maximize code reusability and maintainability.
- **Legacy Modernization:** Orchestrated the migration of legacy test suites to modern frameworks, ensuring zero downtime and improved coverage for mainframe and web-integrated APIs.

Test Engineer May 2016 – Jun 2020

Infosys Limited · Mysuru, Karnataka

- **Framework Development:** Developed an automation framework using Selenium with the Page Object Model (POM) for end-to-end functional testing, enhancing maintainability and scalability of test scripts.
- **Test Execution:** Created an automation framework with UFT to perform smoke and sanity testing, ensuring application stability and robust test coverage across multiple functionalities.
- **Cross-Platform Testing:** Conducted regression testing on mainframe systems, web applications, and APIs using SOAPUI, ensuring integration and functionality across different platforms.

KEY PROJECTS

 SunTrust Bank, USA – Risk in Finance

- › Alert Case Tracking System
- › Suspicious Transactions & Account Monitoring
- › High Risk Client Scanning
- › Large Cash Reporting System

 Commonwealth Bank of Australia

- › Portfolio Lending
- › Simple Credit

 ABN AMRO, Netherlands

- › Enterprise Content Management

 GlobalSignIn Pte Limited

- › Great Events Made Easy
